

BUZZYBRAINS ACADEMY · PUNE

Board Exam Study Planner

Class 10 & Class 12 · CBSE, ICSE & Maharashtra Board

A printable, month-by-month planning framework built by IIT Kanpur-mentored faculty — covering how to sequence your syllabus, revise without cramming, and walk into your board exam prepared, not panicked.

WHAT'S INSIDE

- A universal weekly planning template you can reuse across every subject
- The spaced-revision framework we teach every BuzzyBrains student
- Board-specific month-by-month roadmaps for 5 grade/board combinations
- A printable final-week exam-readiness checklist

Prepared by Dilip Sah (IIT Kanpur alumnus, JEE AIR 400) and the BuzzyBrains Academy faculty team.

BEFORE YOU START

The Planning Framework

Every board and grade section in this planner uses the same underlying framework — a weekly time template and a spaced-revision cycle. Fill these in for your own subjects before jumping to your board-specific section.

1. Your Weekly Study Grid

Photocopy or redraw this grid weekly. Fill in one subject per slot — rotate subjects across the week rather than studying only one subject per day.

Day	Morning	Afternoon	Evening / Revision
Mon			
Tue			
Wed			
Thu			
Fri			
Sat			
Sun			

2. The Spaced-Revision Cycle We Teach

A topic studied once is not a topic learned — it fades without deliberate revisiting. Use this cycle for every chapter, adjusting the exact gap to fit your own exam timeline:

- First pass: learn the chapter properly — understand, don't just read.
- Revisit 1 (about a week later): self-test from memory before re-reading anything.
- Revisit 2 (a few weeks later): redo the hardest 2-3 problems or questions from the chapter.
- Revisit 3 (before the exam): a fast, high-yield pass — formulas, diagrams, key definitions only.

3. Three Rules That Matter More Than Hours Studied

- Active recall beats re-reading. Testing yourself (from memory) builds retention far faster than passively re-reading notes.
- Consistency beats intensity. A steady daily routine sustained for months outperforms occasional long, exhausting sessions.
- Review your mistakes, not just your scores. Every wrong answer should tell you exactly what to revise next — not just how you did.

Turn the page for your specific board and grade's month-by-month roadmap.

CBSE

Class 10 Study Roadmap

English

Hindi/Second Language

Mathematics

Science

Social Science (+ optional skill subject)

Most CBSE Class 10 subjects combine a board written exam with an internal assessment component (periodic tests, portfolio, practicals/activities) — the exact split varies by subject, so always confirm current weightage from your school's official circular.

What to Focus On

Mathematics and Science reward NCERT-first, formula-and-derivation depth over rote learning — questions increasingly test application, not just recall.

Month-by-Month Roadmap

Phase	Focus
Apr - Jun	Build genuine chapter-by-chapter understanding across all subjects; do not rush ahead without solidifying basics.
Jul - Sep	Complete full syllabus coverage; begin first-pass revision of earlier chapters alongside new ones.
Oct - Dec	Full-syllabus practice papers under timed conditions; identify and close specific weak chapters.
Jan - Feb	Focused revision using NCERT + previous years' papers; sample-paper mocks under real exam timing.
Mar	Light, high-yield revision only — formulas, diagrams, key definitions; protect sleep and stay calm.

Specific Tips for CBSE Class 10

- Redo NCERT in-text and back-exercise questions from memory, not just recognition.
- Keep a single formula/definition sheet per subject, updated and revised weekly.
- Attempt at least 5-6 full previous years' papers under real time limits before the exam.

Exact syllabus weightage, paper patterns and exam dates are set and updated by your board each year — always confirm current details from your school and your board's official website.

ICSE

Class 10 Study Roadmap

English

Second Language

Mathematics

Science (Physics/Chemistry/Biology)

History & Civics

Geography

ICSE (CISCE) typically includes an internal assessment / project component alongside the written paper for most subjects, and is generally known for going into descriptive depth per topic — precise weightage varies by subject and year, so confirm with your school.

What to Focus On

ICSE's broader, more descriptive syllabus rewards structured written answers and strong English expression across subjects, not just Science and Maths.

Month-by-Month Roadmap

Phase	Focus
Apr - Jun	Build depth chapter by chapter; start project/internal-assessment work early rather than late.
Jul - Sep	Complete syllabus; practice structured, full-sentence answers for History, Civics and Geography specifically.
Oct - Dec	Full previous-years' paper practice; refine answer-writing technique and time allocation per section.
Jan - Feb	Consolidate project/internal assessment submissions; intensive revision and mock papers.
Mar	Final, light revision — key diagrams, dates, formulas; review your own previous mock-paper mistakes.

Specific Tips for ICSE Class 10

- Practice writing full, structured answers for Humanities subjects, not just point-form notes.
- Start project work and internal assessment submissions well before the deadline crunch.
- Revise English grammar and composition regularly — it carries real weight across ICSE's language-heavy paper style.

Exact syllabus weightage, paper patterns and exam dates are set and updated by your board each year — always confirm current details from your school and your board's official website.

MAHARASHTRA STATE BOARD

Class 10 (SSC) Study Roadmap

Marathi/English

Hindi

Mathematics (Algebra & Geometry papers)

Science (Paper 1 & 2)

Social Science (History-Pol. Science & Geography)

Maharashtra SSC exams are primarily written, theory-based papers, with practical/oral and internal assessment components for Science and language subjects — Mathematics is assessed as two separate papers (Algebra and Geometry).

What to Focus On

Because Maths is split into two separate papers, each needs its own dedicated, tracked preparation rather than being treated as a single combined subject.

Month-by-Month Roadmap

Phase	Focus
Apr - Jun	Build separate, genuine understanding in Algebra and Geometry — do not let one overshadow the other.
Jul - Sep	Complete full syllabus across both Science papers and Social Science; keep pace evenly across subjects.
Oct - Dec	Practice previous years' question papers for each paper separately, under real time limits.
Jan - Feb	Focused revision of formulas (Algebra/Geometry), diagrams (Science), and map work (Geography).
Mar	Light final revision; recheck practical/oral preparation and submission requirements.

Specific Tips for Maharashtra State Board Class 10 (SSC)

- Track Algebra and Geometry as two separate preparation tracks with their own practice-paper sets.
- Practice map-based questions for Geography and diagram-labeling for Science specifically — these are frequently under-practiced.
- Solve at least 5 years of previous board papers per subject under real exam timing.

Exact syllabus weightage, paper patterns and exam dates are set and updated by your board each year — always confirm current details from your school and your board's official website.

CBSE

Class 12 Study Roadmap

Stream-specific: Physics

Chemistry

Maths/Biology (Science)

Accountancy

Business Studies

Economics (Commerce)

Humanities electives (Arts)

Class 12 CBSE subjects generally combine a board written theory exam with practicals (Science) or projects/internal assessment (Commerce, Arts) — exact weightage varies by subject, so confirm current-year details from your school.

What to Focus On

If you are also preparing for JEE or NEET, your board revision calendar should be deliberately aligned with your competitive-exam preparation, not run as two disconnected tracks.

Month-by-Month Roadmap

Phase	Focus
Apr - Jun	Build genuine NCERT-level depth — this base directly supports both board marks and JEE/NEET preparation.
Jul - Sep	Complete syllabus; begin practicals/project work early for Science and Commerce streams.
Oct - Dec	Full-length board-pattern practice papers; if applicable, keep JEE/NEET mock-test rhythm running in parallel.
Jan - Feb	Intensive board-focused revision; finalize practicals/vivas; sample-paper mocks under timed conditions.
Mar	Final, high-yield revision only — NCERT line-items, formulas, diagrams; protect sleep before each paper.

Specific Tips for CBSE Class 12

- Use NCERT as the shared base for both board exams and JEE/NEET — it is not "extra" work, it is the same foundation.
- Schedule practicals and project submissions early — a rushed practical exam hurts both marks and stress levels.
- If pursuing JEE/NEET too, see our dedicated revision and time-management guides on the BuzzyBrains blog.

Exact syllabus weightage, paper patterns and exam dates are set and updated by your board each year — always confirm current details from your school and your board's official website.

MAHARASHTRA STATE BOARD

Class 12 (HSC) Study Roadmap

Stream-specific: Physics

Chemistry

Maths/Biology (Science)

Book-Keeping & Accountancy

Economics

Organisation of Commerce (Commerce)

Humanities electives (Arts)

HSC exams are primarily written theory papers, with practicals for Science-stream subjects and internal assessment components in several subjects — precise structure varies by subject, so confirm current details from your junior college.

What to Focus On

HSC and JEE/NEET syllabi overlap substantially but are not identical in question style — board answers reward structured, complete written responses, while JEE/NEET reward fast, precise application.

Month-by-Month Roadmap

Phase	Focus
Apr - Jun	Build genuine conceptual depth across all subjects — this is the shared base for boards and any competitive exam.
Jul - Sep	Complete syllabus; begin practical preparation early for Science-stream subjects.
Oct - Dec	Full board-pattern practice papers; maintain a parallel JEE/NEET mock rhythm if applicable.
Jan - Feb	Intensive revision and mock papers; finalize practicals; practice full, structured written answers.
Mar	Final, light revision — key formulas, diagrams, and definitions; avoid new material this close to exams.

Specific Tips for Maharashtra State Board Class 12 (HSC)

- Practice writing full, structured answers for HSC even if you are used to JEE/NEET's objective-question format — the skills are different.
- Do not neglect practicals and internal assessment components while focused on competitive-exam prep.
- Align your HSC and JEE/NEET revision calendars deliberately rather than treating them as two separate plans.

Exact syllabus weightage, paper patterns and exam dates are set and updated by your board each year — always confirm current details from your school and your board's official website.

FINAL STRETCH

Exam-Readiness Checklist

Print this page and tick items off in the final two weeks before each paper.

One Week Before

- ☐ Completed at least one full timed practice paper for this subject
- ☐ Reviewed and revised my formula / key-definitions sheet
- ☐ Identified my 2-3 weakest chapters and gave them extra revision time
- ☐ Confirmed exam-day logistics: admit card, stationery, reporting time

The Night Before

- ☐ Light revision only — no new topics
- ☐ Bag packed: admit card, ID, stationery, water bottle
- ☐ Alarm set with a generous buffer for travel
- ☐ Aiming for a full night's sleep, not a last-minute all-nighter

On Exam Day

- ☐ Read the full question paper before starting to write
- ☐ Attempted the questions I am most confident about first
- ☐ Managed time per section — did not get stuck on one question
- ☐ Reviewed answers in the last few minutes if time allowed

Want a personalized study plan, not just a template?

BuzzyBrains Academy runs small batches (max 12 students) across CBSE, ICSE, IGCSE, IB and Maharashtra Board, led by founder Dilip Sah — IIT Kanpur alumnus, JEE AIR 400, 25+ years of mentoring experience.
